To our Set Decorators:

We have exciting news!!! We are in the process of implementing the new software that will process and track your orders. You will no longer have to deal with paperwork that is difficult to read. We are currently training our employees on how to use the program and will phase the system in within the next couple of months.

We are creating a separate database for set decorators that will generate a permanent link between you and your orders, regardless of what production company you are currently working for. By entering your name, the system will bring up all of your orders, both past and present.

In order to put you into the computer we need the following information. (We will never use the information to tele-market, nor will we sell or provide it to other companies.)

Circle One:
